USAMA RAFAQAT

Front End Developer

Lahore, Pakistan • +92 312-7953746 • chusama637@gmail.com| • LinkedIn | • Portfolio |• GitHub |

PROFESSIONAL SUMMARY

Front-End Developer with hands-on experience in building responsive, visually appealing, and user-friendly interfaces using modern technologies such as **HTML**, **CSS**, **JavaScript**, **React**, and **Tailwind CSS**. Adept at translating client requirements into functional and aesthetically pleasing designs. Eager to contribute to team success and grow as a developer while leveraging a strong foundation in front-end technologies.

PROFESSIONAL EXPERIENCE

Frontend Developer

1: Developed responsive and accessible **web interfaces** using **HTML, CSS, JavaScript, Tailwind CSS, and React.js**.
2: Built **reusable React components** and modular UI layouts for dashboards, landing pages, and web applications.
3: Focused on **clean code structure**, component reusability, and performance optimization
4: Implemented **local Storage-based to-do apps, learning platforms, dashboards, and course management UIs**.
5: Deployed multiple projects on **Vercel** for live production demos.
6: Used **Git and GitHub** for version control, code management, and collaborative workflows.

TECHNICAL SKILLS

- **Core Technologies:** *HTML5*, *CSS3*, *JavaScript* (ES6+)
- **Frameworks & Libraries:** *React.js*, *Bootstrap*, *Tailwind CSS*
- **Frontend Concepts:** *Responsive Design*, *Component-based Architecture*, *State Management* (**React Hooks**), *Reusable UI Components*.
-
- **Tools & Ecosystem:**

- Version Control: **Git & GitHub**
- Deployment: **Vercel**

- **UI/UX Essentials:**
- Clean and consistent UI design
- Mobile-first development approach

PROJECTS

FakeStore:

Fake Store is a modern, web-based **e-commerce application** designed to demonstrate real-world frontend development skills. The application allows users to browse products, view detailed information, and manage a shopping cart with a smooth and responsive user experience.

- Built a fully responsive **single-page application** using **React.js**, optimized for desktop and mobile devices.
- Integrated **Fake Store REST API** to dynamically fetch and display real-time product data, categories, prices, and images.
- Implemented **product listing, filtering, and detail pages** to simulate a real e-commerce shopping flow.
- Developed **cart functionality** with state management for adding, removing, and updating product quantities.
- Used **React Router** for seamless client-side navigation and improved user experience.
- Tech Stack: React.js, JavaScript (ES6+), REST API Integration, React Router, CSS / Tailwind CSS, Vercel
- **Live Demo:** FakeStore

Clinic Management System:

A full-featured web application designed to streamline **healthcare** operations by automating administrative and clinical tasks. Built using modern web technologies and deployed on Vercel, this system allows **clinics** to efficiently manage **patient records**, **appointments**, and medical workflows in one platform. Key capabilities include:

- **Add**, **view**, **update**, and organize patient information and **appointment schedules** in a centralized system.
- Maintain secure, digital health records including history, **diagnoses**, and **treatment details**, improving access and reducing paperwork.
- Supports different user roles such as **doctors** and **receptionists** to ensure controlled access and secure operations.
- **Billing & Financial Tracking** tool for managing invoices, **payments**, and basic revenue tracking within the clinic.
- Clean, intuitive interface optimized for ease of use by **clinic staff** and administrators.
- **Live Demo:** Clinic Managemet System

Forex Trading:

The **Forex Trading** platform delivers a clean and efficient **interface designed** for managing content and user interactions seamlessly. It provides a smooth browsing experience with well-structured sections and responsive layouts suitable for all screen size.

- Streamlined the UI to ensure clear navigation and easy access to all core modules.
- Implemented **responsive design** to ensure compatibility across **desktop**, **tablet**, and **mobile devices**.
- Developed reusable **components** and **optimized** layouts for performance and consistency.
- Validated all **UI flows** and interactions to maintain a smooth **user experience**.
- **Optimized page** structure, **animations**, and component rendering for better performance.
- Ensured cross-browser stability and tested on **Chrome**, **Firefox**, and **Edge**.
- **Live Demo:** Forex Trading

EDUCATION

Bachelor of Science (BS) in Software Engineering:
The Superior University

ICS(Physics)

Government Post Graduate College, Sahiwal
